

August 11 Warm-Up

Describe:

The definition of a compiled language is a programming language that is usually implemented with a compiler rather than an interpreter. The term, however, lacks clarity, as theoretically a programming language can be either compiled or interpreted. A compiled language runs through a compiler and converts the code to binary.

Examples of compiled languages are C, C++, C#, and Java.

The definition of an interpreted language is when an interpreter reads and executes source code line by line at runtime.

Examples of interpreted languages are Python and JavaScript.

Compare and Contrast:

A compiled language is similar to an interpreted language because they both use their own syntax and can execute functions.

A difference between a compiled language and an interpreted language is how the code gets run at runtime and how it gets understood by the machine.

August 11 Classwork – HelloWorld.java

Java

```
public class HelloWorld {  
  
    public static void main(String[] args) {  
        System.out.println("Hello World!");  
        System.out.println("My name is Neil.");  
        System.out.println("My favorite color is blue.");  
        System.out.println("My favorite artist is Ed Sheeran.");  
        System.out.println("One thing I like to do is playing video  
games.");  
    }  
}
```

```
~/Coding/AP Comp Sci A/week1 (0.125s)
```

```
java HelloWorld
```

```
Hello World!
```

```
My name is Neil.
```

```
My favorite color is blue.
```

```
My favorite artist is Ed Sheeran.
```

```
One thing I like to do is playing video games.
```

August 13 Warmup – Interview.java

Java

```
public class Interview {  
    public static void main(String[] args) {  
        System.out.println("My partner's name is Jai.");  
        System.out.println("If Jai could be any animal, he would be  
a cat because they sleep all day.");  
    }  
}
```

```
~/Coding/AP Comp Sci A/week1 (0.124s)
```

```
java Interview
```

```
My partner's name is Jai.
```

```
If Jai could be any animal, he would be a cat because they sleep all day.
```

August 13 Classwork 1 – Bunny.java

Java

```
public class Bunny {  
    public static void main(String[] args) {  
        System.out.println(" (\\/)\\n (..)\\no(__)");  
    }  
}
```

```
~/Coding/AP Comp Sci A/week1 (0.133s)
```

```
java Bunny
```

```
(\/  
..  
o(__)
```

August 13 Classwork 2 - Labels.java

Java

```
public class Labels {  
    public static void main(String[] args) {  
        System.out.println("Neil Patil\t\t\tNeil Patil");  
        System.out.println("1436 Brookmill Road\t\t1436 Brookmill  
Road");  
        System.out.println("Los Altos, CA 94024\t\tLos Altos, CA  
94024");  
    }  
}
```

```
~/Coding/AP Comp Sci A/week1 (0.074s)
```

```
java Labels
```

```
Neil Patil  
1436 Brookmill Road  
Los Altos, CA 94024
```

```
Neil Patil  
1436 Brookmill Road  
Los Altos, CA 94024
```
